## ECDF Einstein Center Digital Future

### Digital Transformation in Performing Arts Specific Research and Education Projects

The **UdK Berlin Career College** offers a multifaceted continuing education programme at the UdK Berlin through accreditation courses, master's programmes, workshops, and international summer universities. In particular, digitalisation has changed professions, the processes of artistic creativity, and the worldwide networking of artists and creatives – thus, various forms of experimental digital transfer of knowledge were created for different artistic divisions. Specific research-projects as well as the Digital Transformation Lab are reacting to this development.

**Forschungsstelle Appmusik**  
Institut für Appmusik in Forschung und Praxis

	School
	Master's programme
	Continuing Education

#### Research Center for Mobile Music Making

Main objectives are exploration and systematization of forms of musical practices with apps, to further show connections to current trends in arts and music, and to identify the social dimensions as well as implications for music education.

#### Master's Programme Sound Studies

Interdisciplinary programme combining cultural studies, audio technology, sound art theory and praxis, and audio design. Foci: Auditory Architecture Research (Einstein Junior Fellow) / Research in Media-specific Music and Art, Media Theory, 3D Audio.

#### DigiMediaL – Digitalization of the Music Industry

Faces the paradigm shift through digitalisation of the production and marketing of music by conceiving qualification measures and using multimedia labs for the purpose of non-specialized continuing education.
